

BOUNCE AROUND INFLATABLES, L.L.C.

Safety Tips for Using Inflatables

It is important that all children and adults follow the safety rules when using inflatables. Injuries are always a possibility, no matter what you're doing, but following our simple tips below will help to ensure you and your children remain safe while having fun.

Inflatables should always be used under adult supervision.

The supervising adult can still enjoy the party as long as he or she remains near the inflatable and keeps an eye on it. This ensures children follow the safety rules and avoid doing anything else that might be dangerous.

Avoid unnecessary horseplay or dangerous behavior.

Please do not perform flips, jump off walls, throw people or jump into other people while inside the inflatable. Do not bounce near the entrance as people may be entering or exiting. Have fun, but don't do anything risky.

Leave personal items outside the inflatable before entering.

Remove your shoes, jewelry, watches, or any article of clothing that may fall off while bouncing. Do not bring sharp or dangerous objects into the inflatable. These items may get lost, or worse, hurt someone.

Watch what goes on outside the inflatable as well as inside.

Make sure children do not play outside the inflatable, especially where other children may be entering and exiting. Keep children away from the electric cord and air blower to avoid child injury and damage to the equipment.

Exit the inflatable in case of an emergency.

During bad weather, including rain, lightening, thunder or heavy wind, please exit the inflatable and turn off the equipment. If the inflatable deflates, please exit and check the power cord for disconnection. Please contact us immediately.

Individuals with health concerns should not use inflatables.

People with head, neck, back or other muscular-skeletal injuries or disabilities, pregnant women, small infants and anyone who may be susceptible to injury from falls, bumps or bouncing are not permitted in the inflatable at any time.
